HBV-100

HBV-100 High Buoyancy Vest

The HBV-100 has been designed to meet the fit, gear requirements and safety needs of today's water professionals. It is the first USCG device approved with up to 23 lbs of gear attached to the vest (to simulate the real world requirements of some professionals). All components such as rescue belt, thigh straps and collars have been tested and approved through the HBV's USCG testing process.

White Water Version

The HBV-100 high buoyancy rescue vest has been designed and USCG tested to safely carry the gear SAR professionals need to execute their duties.

Features:

- USCG Approved to be worn with Level III- A body armour
- USCG Approved with up to 23 lbs of gear worn on the vest
- 3-D construction (circular) design insures optimum comfort/fit
- MOLLE System for flexibility in attaching accessories
- 3" Shoulder (length) adjustment system
- Crotch-Straps
- Quick Release Rescue Belt
- SOLAS Reflective tape Front & Back
- 400D Cordura nylon shell for rugged performance.

Sizes:

M/L 34"-44" & XL/XXXL 45"-55

Colors:

High Vis Yellow/Black or Red/Black

USCG Type V Work-Vest

MOLLE Shoulder Adjustment Straps

Tactical Vest Version

Engineered to be the gear worn by law enforcement professionals. HBV-100 high buoyancy vest has been designed and USCG approved with the inclusion of Level IIIA body armour and up to 23 lbs. of gear worn on the vest

Features:

- The MOLLE system allows customization of gear worn on the vest.
- Easy to attach Duty Belt System has quick release feature (for rapid doffing of vest)
- Neck support collar can be removed.
- Hook/Loop allows attachment of (optional) reflective POLICE patches.
- Adjustable Shoulder allows custom 'length' adjustment.
- Liner has vapor channels for improved ventilation comfort.
- 400D Cordura nylon shell for rugged performance.

Sizes:

M/L 34"-44" & XL/XXXL 45"-55

Colors:

Black

Flotation Clothing Story

Our Flotation Coats, Suits and Pants origins date back into the early 90's in Canada. Our designer Helmut (Helm) Siepmann set out to develop gear that's easier to wear, rain proof and rugged. Helm has continuously reengineered these designs over the decades.

FirstWatch has earned its reputation among marine professionals as the very finest gear designed to meet their emergency and everyday needs.

The FirstWatch flotation coat design has been selected by the Royal Canadian Navy as their new generation flotation deck parka. These jackets are being built by International Custom Products in Toronto, Canada.

Testimonials

The guys love these suits! I can't say enough about them. It was around -20F on Tuesday when we got up to the lake and no one complained all day about the cold.

- T/Sgt. Tom Barden – New York State Police – Division Diving Officer

I love this coat as it has become a part of me and my routine and is extremely comfortable to wear from day. During special circumstances when I don't wear it for work, for example, when flying out to a ship via helo. I find myself feeling incomplete like I'm missing something. This coat was extremely comfortable to wear from day one.

- Capt. Carl Martin Jr. – Unit "Yankee" – San Francisco Bar Pilots

Wore your gear yesterday during some surf testing I did with a wing boat. We were navigating in and out of the inlet with about 8 foot swells in a 4.7 inflatable with a SS MFE – It was raining and blowing out of the NE at 20 Knots. In short, it was pretty nasty – Your gear kept me completely dry – it worked great!

- Justin Antolini – BRP

These Guys have been using them and the reviews are coming back great! They have all raved about the jacket and the comfort and fit of the pants. [we] used them in Ft Lauderdale in +80 Degree weather and were amazed at how they breathed and how comfortable they were in the heat.

- Keith Matthews - SFPD

Ice Rescue Suit

RS - 1000 - Ice Rescue

Rescue professionals need gear that allows them to respond safely and quickly to emergency situations. The RS-1000 Rescue Suit has been engineered to don quickly for cold water and ice rescue operations. This universal fit suit features a rugged hi-tenacity nylon shell that is stitched and taped for the ultimate in durability.

A snap out, internal (laminated nylon/foam) liner allows the user to easily slip the suit on and off. It has been designed as a system to meet the safety, mobility and comfort needs of rescue professionals.

Features:

- Protective Center Zipper Flap
- Internal suspenders
- Registered Serial Number
- Reflective Rescue Markings
- Zipper Wax
- Stow Bag: Mesh Accessory Pocket

Hi-Vis Yellow; Red; OD Green

Sizes	Head Circumference (Inches)
S/M	21.0 - 22.5
L/XL	22.5 - 24.4

Warning: Due to nature of the test standards, a helmet tested to the CE EN 1385 standard is not intended for use in whitewater class four and five as described by the International Canoe Federation. Helmets intended for use in those conditions (no unusual on whitewater rivers) are outside the scope of the CE EN 1385 Standard. It is expected that these helmets will have performance requirements in excess of the particular standard!

About The CE EN 1385 Standard: There are six major requirements for helmets to receive the 1385 standard:

1. Field of vision - does not interfere with the user's field of vision Extent of coverage
2. Making sure the helmet covers all necessary parts of the head
3. Shock absorbing capacity - The helmet is dropped with the speed of 2,5m/s onto a solid metal anvil. Inside the metal head there's an accelerometer that measures the forces within the impact. The helmets are tested : High temperatures (+35°C), low temperature (0°C). Each helmet is tested on several areas including the crown, side, rear and front. The peak acceleration must not exceed 250G for any of the impacts.
4. Retention system performance - the strength of the retention system (webbing) and ability to keep the helmet securely positioned on the head.
5. Buoyancy - the helmet must float to the surface.
6. Durability - After all tests the helmet should not show any damage.
